PUNTLAND Y-PEER NEWSLETTER, ISSUE 1, VOLUME 01, JULY - OCTOBER 2011

MESSAGE FROM PUNTLAND Y-PEER EXECUTIVE DIRECTOR ON HIV/AIDS.

Although tremendous progress has been made in Somalia in combating HIV/AIDS The epidemic continues to grow, more than thousands people still live with HIV in this country and approximately one in twenty don't even know they're infected. Some thousands of people, their families, and their communities, are now living with HIV. Effectively tackling this epidemic remains one of the world's most pressing public health challenges.

Abdiweli Ali Abdulle

Counseling and testing are essential so that people who are infected can know their status, seek care, and using their increased knowledge, change their behaviors to prevent transmission of the virus to others. Those who are tested can also use knowledge of their status to protect themselves. However, Y-peer has always been involved and working on HIV/AIDS Programs such as conducting awareness campaign, Advertisement of HIV/AIDS programs through the local radios, Develop IEC-Materials. Conduct HIV/STI- prevention Trainings for youths, Take leading role on the various international days such as, World Aids Day, International Youth Days. This has now brought so many of the community members to get more knowledge and information on HIV/Aids with the help of the above methodology that was implemented by Y-PEER.

Puntland Y-peer Network is a groundbreaking and comprehensive youth to youth initiative pioneered by UNFPA, the network established in Puntland after 28 Y-peers Educators has been trained as TOTs on Nov, 2009 and currently aiming to attract more members.

ROLES OF PIRACY IN HIV/AIDS TRANSMISSION

Following the outbreak of the civil war in 1991 and the ensuing collapse of governmental authority, a significant problem with piracy in the waters off of the coast of Somalia began to emerge. Piracy arose as a response by local fishermen from littoral towns such as Eyl, Kismayo and Harardhere to illegal fishing by foreign trawlers.

Puntland's administration recently enacted a number of reforms and pre-emptive measures as a part of its officially declared anti-piracy campaign.

The latter include the arrest, trial and conviction of pirate gangs, as well as raids on suspected pirate hideouts and confiscation of weapons and equipment; ensuring the adequate coverage of the regional authority's anti-piracy efforts by both local and international media; sponsoring a social campaign led by Islamic scholars and community activists aimed at discrediting piracy and highlighting its negative effects. .

On the other hand the effects of piracy to the community differ for instance the youth of Puntland face immense challenges in every aspect of their lives especially high numbers of youth involving negative social activities like piracy thus leaves the youth idle and prone to other illegal activities like Al-Shabaab and Al Qaeda.

Other critical challenges brought by piracy and related to HIV/AIDS include:

- **MARRIAGE:** Women in Somalia are married by pirates due to high payment of dowry which will result of infecting women with the epidemic without going for testing with the aim of knowing their HIV status.

- **MULTIPLE PARTNERS:** Having more partners will create and give a chance the epidemic to spread. Hence, having sex with many partners is automatically one of the easiest ways of infecting between the people.

- **RAPE:** Women became victims of rape. Raping of women has had negative impact to their lives which resulted HIV/AIDS transmission.

- **DIVORCE:** Most of the women divorced by pirates are normally married by other men as a result will lead the plague to transmit easily.

- **KIDNAPPING:** hostages taken especially women are forced and raped without their consent hence, will contribute to the spread of the disease.

- **PROSTITUTION:** Sex workers are the most at risk and they can easily transmit the endemic of HIV/AIDS after having unprotected sex with the pirates. The sex workers are from the borders.

- **DRUG ABUSE:** intoxicant drugs such as khats, cocaine, wine, cannabis etc. will contribute to infection of disease due to lack of emotional control and consequently can lead to the spread of HIV/AIDS.

PREVENTION AND FIGHT AGAINST PIRACY

An extensive meeting regarding prevention and fight against piracy was held today at the Bossaso Chamber of Commerce.

The meeting had wide participation from various prominent persons such as representative from the government who were the Minister of finance, Hon. Faarah Ali Shire, the State Minister of Commerce Hon. Mohamud Faarah Beeldaaje and the Deputy Minister of Security Hon. Abdijamal Mohamed Osman. Also in the meeting was the Mayor of Bari region, Mr. Abdisamed Mohamed Galan.

In addition, present in the meeting were members from the Puntland business community, Peace activists, intellectuals, and valuable guests from various spheres.

It was during the end of the meeting the puntland business persons presented information they alluded to newspapers that pirates are becoming a stumbling block against smooth-running of their businesses and business of the entire world, in general. They also informed that in this year alone, pirates held to ransom nine ships with Somali business persons on board.

These ships were destined to carry goods to and/or out of Bossaso port.

The business people also mentioned that the community and government should come to the same platform in countering problems brought by their savage handiwork. This will only made possible through cooperation and use of other relevant avenues in order to fight pirates both in land and sea.

Moreover, the business people unanimously informed that pirates have had negative impact on the economy of Puntland with bottlenecks faced especially in the season of Hajj which used to be a pick season of livestock export. This

forced ships which used to carry products either refrain sailing in Somali waters or charge double the usual prices.

They also mentioned that it is clearly seen that pirates and acts of piracy has brought more harm to the country which were not present before the genesis of piracy.

Therefore, we give sincere advice to the youth who are linked directly or indirectly to the act of piracy to desist from

such as vicious act that ruins the reputation of Somali people and destroy glimmer of hope in the future of the Somali youth.

Hundreds of youth have been killed while they were engaging in the act of piracy, similar number or more have been held in captivity in different corners of the world not knowing what fate has in store for them.

It is equally important for every Muslim to have deep belief that his/her provision has been written down in a protected scribe while we were only four months old in our mother's womb. Searching for wealth through wrong channels can lead an individual into unexpected problems. Imagine a scenario where you are caught by a soldiers you

have knowledge of, of different religion, share no cultural similarities and at the same time, happen to put you into a pit you never have a hope of getting anytime soon. WHAT WILL YOU DO?

YOU RIP NOTHING BUT PROBLEMS AND SEVERE TORMENT.

Dear brothers, led detach ourselves from acts of piracy and re-trace back to the teaching of Islam, repent for our wrongdoings and devote to worship of our lord the Almighty.

OUR LORD THE ALMIGHTY IS ALL MERCIFUL AND FULL OF FORGIVENESS.
